To whom it may concern:

I'm writing to recommend Abel Lefel Fernandez for any internship regarding his studies in videogame design and/or development. He carried out a *Videogame Programming* internship at our company, Cuicui Studios S.L., from march 23th, 2020 to august 14th, 2020. During his time with us, he was charged with different tasks related to game development, ranging from researching cloud technologies for back end services to developing a prototype, including writing code for UI, data management and gameplay. He also took part in brainstorming and design sessions, where he gave insight and helped in developing game mechanics.

Abel got integrated with the team really fast (even with the difficulties of working remotely during the first weeks due to the COVID-19 pandemic) and showed much interest in all the tasks and challenges he had to face. His passion for videogame development was clear at all times. He showed good attitude and proved to be a valuable asset for the team, therefore I believe he will easily fit in any game design or development position.

Please feel free to contact me by email (andres@cuicuistudios.com) if you have any questions.

Yours sincerely,

Andrés Fernández Bermejo
